Installation Guidelines
Bench with Backrest (4', 6' and 8')

Tools Needed: **Ratchet set, wrenches (Roto-hammer needed for optional expansion bolts)**

Step 1: Posts, Seat Plates & Angle Iron

Attach the (2) seat plates (Part #4) and (1) angle iron (Part #12) to the inside face of the (2) posts (Part #14) with bolts "A".

Step 2: Durawood Bench Slats

Sandwich the bent bench straps (Part #5) between seat plates (Part #4) and Durawood slats (Part #6) and secure with lag bolts "B" (*Note – Bolt "B" will travel through the angle iron (Part #12), seat plate (Part#4), bent bench strap (Part#5) and into the Durawood slat (Part#6) in that sequence).
Sand which the center bent bench strap (Part #5), at center of bench, between angle iron (part #12) and Durawood slats (Part #6) and secure from the bottom with Bolt "B"
***Note – Center strap will rest on top of angle iron.**

Step 3: Miscellaneous

Use can of black spray (semi gloss) paint to touch up scratches from shipping or erection.
